

LORD Micro-Prismatic Reflective Tape

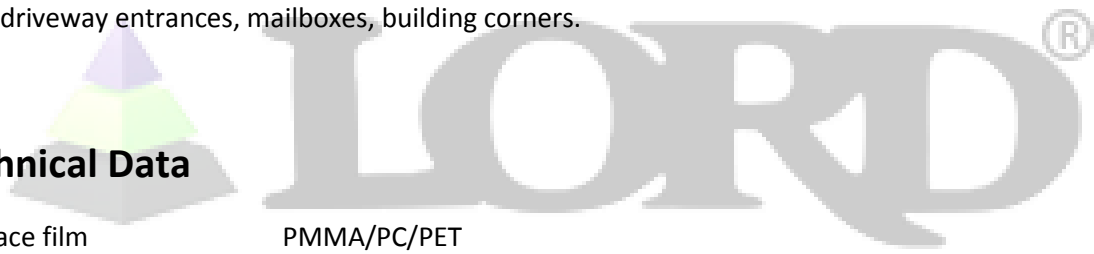

Product Description

It is based on LORD Micro -Prismatic Reflective ilm (PMMA/PC/PET), coated with permanent pressure sensitive adhesive. The feature is including: high-pressure water resistance, gas and diesel oil resistance; flexible performance, easy operation; unique designed back glue with the characteristics of a strong intention; low-temperature resistance; no harm to paint surface and can be stick repeatedly; superior reflection performance, good wide-angle performance and weather durability performance.

Application

The tape is mainly used for truck, trailer, RV, karting, farm equipment, tractor cator, golf, car, moped, bicycle, yard cart, children vehicle toys, snow machine, motorcycles trailer, and so on. It is also used to mark driveway entrances, mailboxes, building corners.

Technical Data

Surface film	PMMA/PC/PET
Types of Adhesive	Pressure-Sensitive Type
Liner	PET Film
Thickness of film	0.75mm
Thickness of glue	0.05mm
Thickness of capsule and base	0.06mm
Total Thickness of product	0.45mm
Operating Temperature	20 - 28°C
Working Temperature	-20 -80°C
Durability (PMMA)	5-10 years
Durability (PC)	3-5 years
Durability (PET)	1-3 years

Packaging

Size	Rolls per carton
5cmX45.7m	10

Other rolls widths/lengths available on request.
