

LORD PET Anti Slip Tape

Product Description

Based on PET Film and quartz/Emery/aluminum oxide sand coated with acrylic glue. It has a tensile strength, rigidity and hardness, which is water proof, has good chemical stability, can resist temperature of 120°C. There are many colors like black, yellow, white, grey, blue, grey, red, brown, fluorescent, transparent, luminous, black/yellow.

Applications

LORD PET anti slip tape usage is as following:

- 1) Equipment: skateboards, scooters, treadmills, fitness equipment, machine tools, printing machine, the foot paddle and the channel, stepped on the bus.
- 2) Place: Kindergartens, schools, swimming pools, home for the elderly, stations, ports, hotels, clubs, kitchens, bathroom, sports, fitness and recreation rooms, entrance and pedestrian ramps, freight yard, working area and decks and other places.
- 3) Can also be used for recreation and tour buses, boats, trailers, trucks, planes on a hanging ladder, large or small power equipment.

Technical Data

Carrier	PET- Aluminum oxide
Grips	60#
Thickness	0.75-0.85mm
Adhesive	solvent Acrylic
Initial tack (#)	≥1
Holding Power (h)	≥33h
180° Adhesion to steel	≥ 7.961N/25mm

Peel Strength -immediate	2.1 kg/in
	-24 hours 2.6kg/in
Tensile deformation	≤3%
Rupture elongate Tate	15%
Common Temperature	0°-80°C
Core Diameter	76mm
Width	5cm
Length	5m/10m
